

TECHNICAL INFORMATION

ELECTRICAL POWER:

USL and USR each:	Catwalk:
(3) 400A 208VAC	(1) 400A 208VAC
(2) 200A 208VAC	(1) 200A 208VAC
(1) 100A 208VAC	

** Catwalk feeds can be used to power scoreboard or show, but not both.*

Floor power in each of the two west corners:
(2) 200A 208VAC. Shore power at loading dock.

LIGHTING AND ACOUSTICS:

State-of-the-art lighting and sound equipment

SPOTLIGHTS:

- (6) Strong Xenon Gladiator II (3K)
- (4) Strong Xenon Super Trooper II (2K)

HOUSE LIGHTS:

Shuttered metal halide sports lights supplemented with fluorescent and quartz fixtures controlled from backstage and house sound room.

MESSAGE BOARD:

360-degree arenamation board ringed the Bremer Bank Suite Level with 15mm pixel spacing plus two message panels the full length of the upper level side fascia.

SCOREBOARD:

Xcel Energy Center's state of the art center-hung video features HD/LED technology and 6mm pixel spacing resolution. Pixel spacing is the distance between pixels. The total resolution equals the total number of pixels per display. The smaller pixel distance, the higher the resolution. The two main displays on each side measure 39' 9" high by 53' 8" wide. The video display area on the sides measures 18.75' high x 37.5' wide and the ends measure 18.85' high x 23.92' wide. The ribbon displays on the top and bottom ring of the scoreboard each measure 3.5' feet high. It is not possible to rig through the scoreboard.

LOADING DOCKS:

Four loading docks at stage left, plus drive down ramp access to the arena level.

One freight elevator with accessibility to all levels (except press level).

MAIN DOCK:

310 Eagle Street (located directly under Kellogg Blvd. on the south side of the RiverCentre complex). Enter Eagle Street from the intersection of 7th Street and Kellogg Blvd. Follow Eagle Street down the hill ½ block, and turn left into RiverCentre Dock. Trucks will exit this dock onto South Exchange Street.

ROY WILKINS AUDITORIUM LOADING DOOR:

At the intersection of 5th Street and 7th Street, follow 5th Street east ¼ block. Turn right at the driveway immediately before Wilkins building. Follow driveway up to Roy Wilkins Loading Door.

RIGGING:

Floor to Beam: 132 feet
Show Grid Capacity: 140,000 pounds
Approved Labor Services Include: IATSE Local 13

HOUSE EQUIPMENT:

One - 10K lb. capacity forklift (LP gas)
One - 8K lb. capacity forklift (LP gas)
One - 6K lb. capacity forklift (LP gas)

TELEPHONE SERVICE:

POTS/Analog Lines
ISDN (can also support AT&T or 5ESS)

TELEVISION SERVICE:

An in-house closed-circuit television service is available with feed to the scoreboard, concession areas, restaurant and suites.
